

Good afternoon Math Recovery Champions and Leaders,

We are thinking of you during this unusual time as educators across the country develop innovative ways to continue learning experiences for our nation's children. The purpose of this message is to provide information and communicate opportunities to support each other as school and Math Recovery leaders.

US Math Recovery Council remains open! We are continuing to build and ship course kits and educational products where district receiving centers are open. Many of our Eagan office staff are home officing, allowing for a safe working environment for Natalie in the warehouse area. Our production team is contacting districts and individuals before shipping to confirm the packages can be received and expanding delivery options to include home addresses. Contact Lisa (lisaj@mathrecovery.org) to change the address on an existing order. We are also able to assist with new orders. We understand local situations vary greatly across the United States and we are prepared to service changes to your plans and schedules.

Need to make changes to current courses scheduled? Margie Broman (margie@mathrecovery.org) is available to make changes to your course information on the website.

Where applicable, we can use the Math Recovery tools available to us to support mathematics teachers in a different way. Innovative ideas for using Math Recovery tools are encouraged and embraced! Our Math Recovery team is available for discussing ways to support teachers and parents. [Our next](#)

[Champion support session is scheduled for April 1.](#) This session will be run as a campfire session for implementation to allow our members to share how educators in their area are approaching instruction with students in our current changing environment. These sessions are an opportunity to come together to share resources and discuss how best to meet the current needs.

Additionally, in the coming days, USMRC will be launching a page with resources and discussion thread to bring together educators working in a range of communities. We welcome your ideas and resources to be included on this site! Watch for more information to be coming soon.

Our Math Recovery team is thinking of you during this unprecedented time. You are an amazing group of positive and resilient educators!

Warmly,

Christina
